

Dear Media partners!

We hereby inform you that from November 29 to December 1, 2022, in St. Petersburg, at the ExpoForum Exhibition Center (Peterburgskoye shosse, 64/1), an International Robotics Forum will be held within the framework of the Russian Robotics Week-2022. The purpose of the event is to demonstrate advanced robotic products and services, programming and control systems for robotic and automated equipment, including the use of artificial intelligence systems, as well as the exchange of scientific and practical experience between industry experts.

The organizers of the event are NP "Cluster of High Technologies and Engineering "Creonomyca" and ExpoForum International. General partners are: Concern R-Pro - a group of innovative companies engaged in the system integration of robotics, and KUKA, a global leader among robot manufacturers.

The Robotics Forum will include a thematic robotics exhibition, a conference on topical issues of robotics, an evening robotics show, competitions among students in the format of Robotics Skills.

In 2022, the Robotics Forum will be held in conjunction with the XXVth International Forum "Russian Industrialist", the St. Petersburg Innovation Forum, Engineering Forum, exhibitions of Machine Tool Construction and Metalworking, Instrumentation, Radio Electronics, the international exhibition of industrial safety Sfitex, the international exhibition of logistics equipment Transtec. These events will bring together representatives from different industries so that participants could maximize the synergy from their working at the leading domestic convention and exhibition venue. More than 25 thousand specialists from 30 regions of Russia and 15 countries are planning to take part in the event: international experts, heads of enterprises, government and state authorities, representatives of financial structures, small and medium-sized businesses, technical specialists of industrial plants, representatives of industry and professional associations, unions, funds, technoparks and business incubators, major research institutes, specialized industry committees, investors, financial institutions, investment and insurance companies.

Main sections of the Forum are: robotics in mechanical engineering and metalworking, shipbuilding, car building, aerospace, oil and gas, offshore projects and machine tool construction, robotics in instrumentation and microelectronics, robotics in the food, light, textile, pharmaceutical industry and medicine, agriculture, construction, warehouse logistics, robots in the entertainment industry, intelligent robots, service robots, drones and unmanned vehicles, robots for children.

**Moreover, to meet supply and demand, Business program of the Forum will offer joint sessions between robotics suppliers and representatives of corporations implementing robotic innovations in their structures.**

We invite you become a Media partner! The Organizing Committee offers you the following opportunities for cooperation:

From Organizing Committee

- your logo on the website and in the infomaterials of the Event;
- the status of an Official media partner;
- accreditation of your staff to the Event;
- a package of information and reference materials on the Event;

From Media partner:

- publication of the announcement of the Event;
- publication of press and post-release of the Event;
- placement of the Event banner on the website / in the magazine;
- publication of an expert article or interview of the Event participant.

**Looking forward to our mutually fruitful cooperation!**
