

Dear Media partners!

We invite you to visit the Russian Robotics Week 2023 - a complex of congress and exhibition events in the sphere of robotization, which includes the International Robotics Forum, the thematic Exhibition on Innovations in Robotics, conferences with leading industry specialists, Robotics Skills student competitions, seminars, workshops, robotic performances, etc. The Russian Robotics Week is the only event in Russia dedicated to all aspects of robotics. In Russia, RRW took place annually in St. Petersburg since 2019. In 2023, the Russian Robotics Week will be held from September 18 to 22, the International Robotics Forum will be held from September 20 to 22.

The organizer of the event is Cluster of High Technologies and Engineering "Creonomyca". General partner is R-Pro Concern - a group of innovative companies engaged in the system integration of robotics.

The main topic of the International Robotics Forum is the reform of the Russian robotics market and cooperation with friendly countries - the first results, barriers and opportunities. Special attention will be paid to the exhibition of the advanced robotics products and services, components, programming and control systems for robotic and automated equipment, including artificial intelligence systems.

The International Robotics Forum under the Russian Robotics Week will bring together on one platform the main market players - both leading industrial robotics vendors and distributors, system integrators, suppliers of tooling and other equipment used with robots, suppliers of digital programming systems and robotic equipment control, and representatives of industry, science and education.

Russian and international experts, C-level executives, representatives of state authorities, financial structures, small and medium businesses, chief engineers and technical specialists of industrial enterprises, manufacturers of programming and robot control software, major research institutes and investors are invited to participate in the event.

The Robotics Skills competitions among students in the fields of industrial and collaborative robotics, mobile and service robotics, robot programming, will be held within the International Robotics Forum and attended by schoolchildren, college and university students, and teams from various companies and clubs.

We invite you become a Media partner! The Organizing Committee offers you the following opportunities for cooperation:

From Organizing Committee

- your logo on the website;
- the status of an Official media partner;
- accreditation of your staff for the Event;
- the ability to distribute printed materials at the Event (not more than 30 copies).

From Media partner:

- make a report about the Event;
- publication of press and post-release of the Event;
- placement of the Event banner on your website / in the magazine;
- publication of an expert article or interview of the Event participant.

Looking forward to our mutually fruitful cooperation!

Organizing Committee of the Russian Robotics Week
and the International Robotics Forum
